Veterinary
Dental Services, LLC

This eight hour event will include lectures, hands-on training and an interactive interpretation session on the topic of digital dental radiography for cats and dogs. All attendees should leave understanding how to obtain diagnostic quality intra-oral radiographs and have the ability to diagnose common dental pathology. Learning objectives include patient and sensor positioning, equipment, exposure settings, and techniques for correcting common positioning problems. Attendees will also learn to diagnose common oral pathology, including periodontal disease, tooth resorption and endodontic disease. This course is only open to veterinarians.

Dr. Bonnie Shope is a diplomate of the American Veterinary Dental College and owner of Veterinary Dental Services, LLC. She is also a member of the Board of Directors for the AVDC and is a past Chair for the College's Examination and Training and Support Committee. She recently recognized an

inherited form of enamel dysplasia in the Samoyed dog and worked with genetic researchers to confirm this and develop a genetic test. Educating general practitioners about dentistry is one of her many passions.
